

## **Life Histories and Health (LHH): Australian and English comparisons**

Australian Research Council Discovery Project 2010 to 2012 (DP1096778)

### **PhD Scholarship**

We are pleased to offer a PhD scholarship for an enthusiastic postgraduate student interested in undertaking research into social determinants of health. The successful candidate will undertake studies under the supervision of Professor Julie Byles at the University of Newcastle and in collaboration with a team of investigators at the University of Sydney including Professor Hal Kendig and Dr Kate O'Loughlin. The scholarship is offered as part of an ARC Discovery Project Grant on "Socio-economic Determinants and Health Inequalities over the Life Course: Australian and English comparisons", a collaboration between the University of Sydney, the University of Newcastle (Australia) and the University of Manchester (UK). This project will examine the enduring impacts of earlier life-course developments on good health and the interrelated outcomes of productivity and well-being in late middle age.

The doctoral research component may involve either qualitative or quantitative lines of enquiry or a mixed methods approach. Students with a background in sociology, psychology, public health or related disciplines are encouraged to apply.

For further information, please contact Professor Julie Byles 0249138 321 or email [Julie.byles@newcastle.edu.au](mailto:Julie.byles@newcastle.edu.au)
