Cutting Edge Ageing Research: Hear from PhD Candidates and Early Career Researchers

This event includes a series of presentations, a research poster display and networking. A prize for best poster will be awarded!

Presenters Include

► **Dr Laura Laslett**

Musculoskeletal epidemiologist and NHMRC Early Career Fellow, Menzies Institute for Medical Research, University of Tasmania.
Career Development and Planning: How to establish a solid track record.

► **Laura Tierney**

PhD Candidate, Queensland University of Technology.
Activity and affect among aged care facility residents with dementia

► **Azam Bazooband**

PhD Candidate, Wicking Dementia Research and Education Centre, University of Tasmania.
Community-based Art: Incorporating the Input of People Living with Dementia.

This event will feature some of Tasmania's emerging leading researchers on ageing. Two PhD candidates will share their findings about research set in both residential and community-based services for people with dementia. A highly successful early career scientist will also present about developing and planning for a career in research. Students/ECR are also invited to submit abstracts related to ageing research for the Poster Presentation and enter the Best Poster Competition.

Attending this event gives you an opportunity to:

- Explore issues outside your day-to-day primary focus
- Present your findings and have discussion on-site
- Develop your own network with Tasmania's research community and health professionals in ageing issues
- Support Tasmania's emerging gerontology researchers

To submit your poster abstract contact Feng Pan; Feng.Pan@utas.edu.au due by **14 August 2019**.
