

## The 2020 Arthur Everitt Award for AAG student members.

Applications close 2nd of September 2020

### THE AWARD:

The Arthur Everitt Award provides two opportunities for eligible AAG student members to receive financial assistance to present their research at the AAG Conference. The Award is designed to encourage and support exposure for research candidates by enhancing opportunities for professional participation and practice within the AAG network and community.

AAG will award the two AAG student members based on the highest quality abstracts as decided by the National Conference Scientific Committee.

### THE PRIZE:

AAG will provide two scholarships of \$1,000 for two AAG student members who are not receiving other funding to attend the AAG Conference in Melbourne.

### WHO CAN APPLY?

Applicants must be a current AAG 'Student' member.

Applicants must be attending "Full Conference" to the AAG conference in the year of application for the Award and presenting their research findings via an oral, poster or tabletop presentation.

Applicants do not have to have had their abstracts accepted at the time of submitting their application for the Award but must show proof of acceptance as soon as received.

**Apply Via a simple online application form:**

*"In November, I received the Arthur Everitt Award. This was a very proud moment for me as I was recognised by my peers as an emerging researcher in the field of gerontology, for my abstract on 'Resilience in rural Australians: A Stakeholder Perspective', alongside my fellow colleague, Md Mijanur Rahman and his abstract titled 'Association between Patterns of Community Care Use and RAC Admission'. The late Professor Everitt was one of the founding fathers of the AAG and I am proud to hold this achievement as one of the pinnacles of my career. Thank you to the AAG and to the Everitt family for providing me with this amazing opportunity." **Kylie Crnek-Georgeson***

*"The AAG 52nd conference was a successful event that covered a wide range of topics, an excellent line of keynote speakers, and a nice engagement of relevant stakeholders. As a PhD student, it was a great opportunity for me to present my findings and build up a connection with fellow peers and senior researchers. I'm so grateful and honored to receive the Arthur Everitt Award which supported the costs of attending the conference. Thank you again to the AAG conference committee for organizing such a fabulous event." **Md. Mijanur Rahman***
